Library of Congress Cataloging-in-Publication Data

Handbook of air pollution from internal combustion engines : pollutant formation and control / edited by Eran Sher.

p. cm.

Includes bibliographical references and index.

ISBN 0-12-639855-0 (alk. paper)

1. Motor vehicles--Motors--Exhaust gas--Environmental aspects.

2. Internal combustion engines--Environmental aspects. 3. Air--Pollution. I. Sher, Eran.

Dedication

I owe my roots to Professor Chaim Elata of the Ben-Gurion University,
Beer-Sheva, Israel,
who taught me how to think.

I owe my stern to the late Professor Rowland S. Benson of UMIST
Manchester, England,
who taught me how to observe.

I owe my foliage to Professor James C. Keck of MIT, Cambridge,
Massachusetts, USA,
who taught me how to analyze.

PART I

OVERVIEW	1
--------------------	---

1. Motor Vehicle Emissions Control: Past Achievements, Future Prospects	3
---	---

John B. Heywood Sun Jae Professor of Mechanical Engineering, Director; Sloan Automotive Laboratory, Massachusetts Institute of Technology, Massachusetts, United States

1.1 Synopsis	4
1.2 Introduction	4
1.3 Motor Vehicles and Air Pollution	5
1.4 The Science of Pollutant Formation and Control	9
1.5 Effectiveness of Current Emission Control Technology.	15
1.6 Direct-Injection Engines, Two-Stroke, and Diesels	17
1.7 Future Prospects	20
References	23

PART II

GLOBAL ASPECTS	25
--------------------------	----

2. Environment Aspects of Air Pollution	27
---	----

Eran Sher Department of Mechanical Engineering, The Pearlstone Center for Aeronautical/ Engineering Studies, Ben-Gurion University of the Negev, Beer Sheva, Israel

2.1 Introduction	28
----------------------------	----

2.3 Global Effects	28
2.3 Regional Effects	35
References	41
3. Health Aspeas of AIr Polltidon	42
<i>Rafael S. Carel</i> <i>Division of Community Medicine, Faculty Health Sciences, soroka Medical Center, Beer Sheva, Israel</i>	
3.1 Anatomy and Psychology of the Respiratory System	43
3.2 Defense mechanism of the Lung	52
3.3 Ventilatory Function Tests	56
3.4 Principles of Inhalation Injuries	58
3.5 Airborne Pollutants Causing Cancer and other Diseases	63
References	64
4. Economic and Planning Aspects of Transportation Emission	65
<i>Pnina O Plaut,</i> <i>Faculty of Architecture and Town Planing, Technion Israel Institute of Technology, Haifa, Israel</i>	
<i>Steven E. Plaut</i> <i>Graduate School of Business Administration, University of Haifa, Haifa, Israel</i>	
4.1 Introduction	66
4.2 The Notion of Optimal Pollution Abatement and control	68
4.3 Alternative Sets of Abatement Policies for Mobile- Source Emission	72
4.4 Administrative Methods of Pollution Emission Control	77
4.5 Indirect pricing Mechanisms	82
4.6 Conclusions	86
References	87
PART III _____	
SPARK-IGNITION ENGINES.	91
5. Introduction Chapter: Overview and the Role of Engines with Optical Access	93
<i>Richard Stone</i> <i>Department of Engineering Science, University of Oxford, Oxford, United Kingdom</i>	
5.1 Introduction	66
5.2 Engines with Optical Access	97
5.3 High-Speed Photography	98
5.4 Flame Front Detection	102
5.5 Mixture Preparation and Combustion Diagnostics	105

5.6	Some Applications of Engine with Optical Access	112
5.7	Conclusions	115
	References	115
6.	Combustion-Related Emissions in SI Engines	118
	<i>Simone Hochgreb</i> Department of Mechanical Engineering Massachusetts Institute of Technology, Massachusetts, United States	
6.1	Introduction	119
6.2	NO _x Formation	124
6.3	Carbon Monoxide	135
6.4	HC Emissions	137
5.7	Summary	163
	References	164
7.	Pollution from Rotary Internal Combustion Engines	171
	<i>Mark Dulger</i> Department of Mechanical Engineering University Ben-Sheva, Israel	
7.1	Introduction	171
7.2	Sources of Hydrocarbon Emissions	175
	References	188
8.	Control Technologies in Spark-Ignition Engines	
	<i>Brian E Milton</i> Nuffield Professor of Mechanical Engineering, Head of School, School of Mechanical and manufacturing Engineering, The University of New South Wales, Sydney, Australia	
8.1	Global and Local Emissions: A Brief Overview of the Problem	190
8.2	Global Emissions from SI Engines.	205
8.3	Engine Control Factors from Local Emissions	209
8.4	Transient Operation of Engines and the Effect on Emissions	210
8.5	Some Details of Control Systems.	222
8.6	Development for the Future	246
	References	255

PART IV

COMPRESSION-IGNITION ENGINES 259

9.	Introduction	261
	<i>Franz F. Pischinger</i> FEV Motortechnik GmbH and Co KG, Aachen, Germany	
9.1	The Diesel engine for Cars—Is There a Future?.	255

x		Contents
	9.2 State of Technology	265
	9.3 Technology for the Future	269
	9.4 Summary and Conclusions	278

10. Combustion-Related Emissions In CI Engines 280

J. Garry Hawley, Chris L Brace, and Frank J. Wallace Department of Mechanical Engineering University of Bath, Bath, United Kingdom

Roy W Horrocks Diesel Engine Powertrain,- Ford Motor Co. Ltd. Laindon, United Kingdom

10.1 Introduction	281
10.2 Review of Current and Projected Emissions Concerns— General Considerations	283
10.3 High-Speed DI Diesel Developments	285
10.4 Overview of Emissions from CI Engines	288
10.5 Current and Projected Global Emissions Legislative Requirements	301
10.6 Advanced Emission Reduction Strategies for the Year 2000 and Beyond	306
10.7 Steady-State and Transient Emissions	337
10.8 Application of Computational Tools Toward Predicting and Reducing Emissions	341
10.9 Advance Engineering Project	350
References	188

11. Control Technologies In Compression-Ignition Engines 358

Stephen J. Charlton Director; Advanced Diesel Engine Technology, Cummins Engine Company, Inc., Indiana, United States

11.1 Introduction	359
11.2 Electronic Fuel Systems for Diesel Engines	365
11.3 Basic Principles of Electronic Control for Diesel Engines.	374
11.4 Electronic Hardware for Diesel Engine Control.	390
11.5 Exhaust Aftertreatment	406
References	417

PART V

TWO-STROKE ENGINES 421

12. Introductory Chapter: From a Simple Engine to an Electrically Controlled Gasdynamic System 423

Cornel C Stan FTZ Research and Technology Association Zwickau, Westsaxon Institute of Zwickau, Zwickau, Germany

12.1 Introduction	424
-----------------------------	-----

xii		Contents
16.	Fuel Effects on Emissions	547
	<i>Yoram Zvirin, Marcel Gutman and Leonid Tartakovsky</i>	
	<i>Mechanical Engineering, Technion, Haifa, Israel</i>	
	16.1 Background	548
	16.2 Gasolines (SI Engines)	550
	16.3 Diesel Fuels (CI Engines)	575
	16.4 Alternative Fuels.	603
	References	619
	Appendix: 1 National Gasoline Specifications	624
	Appendix: 2 National Specifications for Automotive Diesel Fuel.	639
	Appendix: 3 US EPA Models for Calculation of Fuel Effects on Exhaust Emissions	645
	Index	653

List of Contributors

PART I

OVERVIEW

1. Motor Vehicle Emissions Control: Fast Achievements, Future Prospects

Prof. John B. Heywood
Dept. of Mechanical Engineering Massachusetts Institute of Technology
Cambridge, MA 02139
tel: 617-253-2243
fax: 617-253-5981
e-mail: jheywood@mit.edu

PART II

GLOBAL ASPECTS

2. Environmental Aspects of Air Pollution

Prof. Eran Sher
Dept. of Mechanical Engineering
Ben-Gurion University
Beer-Sheva 84 105
Israel
tel: 972-7-646-1394
fax: 972-7-647-2990
e-mail: sher@menix.bgu.ac.il

3. Health Aspects of Air Pollution

Prof. Rafael Carel
Soroka Medical Center

Beer-Sheva, Israel
tel: 972-7-6494-663
fax: 972-7-649-3934
e-mail: rcarel @ post.tau.ac.il

4. Economic and Planning Aspects of Transportation Emission

Dr. Steven E. Plaut
Graduate School of Business Administration
University of Haifa
Haifa 31905, Israel
tel: 972-4824-0140
fax: 972-4824-9194
e-mail: rsec792@uvm.haifa.ac.il

Dr Pnina O. Plaut
Faculty of Architecture and Town Planning
Technion, Haifa, Israel

PART III

SPARK-IGNITION ENGINES

5. Introductory Chapter: Overview and the Role of Engines with Optical Access

Dr Richard Stone
Department of Engineering Science
University of Oxford
Oxford OX1 3PJ
United Kingdom
tel: 44-1865-273-000
fax: 44-1865-273-010
e-mail: richard.stone @ cng.ox.ac.uk

6. Cornbustion-Related Emissions in 51 Engines

Prof. Simone Hochgreb
Dept. of Mechanical Engineering
Massachusetts Institute of Technology
Cambridge, MA 02139
tel: 617-253-0972
fax: 617--53-9453
e-mail: simone@mit.edu

7. Pollution from Rotary Internal Combustion Engines

Dr Mark Dulger
Department of Mechanical Engineering

Ben-Gurion University
Beer-Sheva 84 105
Israel
tel: 972-7-646-1353
fax: 972-7-647-2990
e-mail: rmarkd@menix.bgu.ac.il

8. Control Technologies in Spark-Ignition Engines

Prof. Brian Milton
School of Mechanical and Manufacturing Engineering
The University of New South Wales
Barker Street, Gate 14
Kensington, Sydney 2052
Australia
tel: 61-2-385-4088
fax: 61-2-663-1222
e-mail: milton@unsw.edu.au

PART IV

COMPRESSION-IGNITION ENGINES

9. Introduction

Prof. Dr. Franz Pischinger
FEV Motorentechnik GmbH and Co. KG
Neuenhofstrasse 181
Aachen D-52078 Germany
tel: 49-241-5689-10
fax: 49-241-5689-224

10. Combustion-Related Emissions in CI Engines

Dr. Gary Hawley
School of Mechanical Engineering
University of Bath
Bath, United Kingdom
tel: 44-1225-826-860
fax: 44-1225-826-928
e-mail: ensjgh@hath.ac.uk

R.W. Horrocks
Advanced Diesel Engines
Research and Engineering Centre
Ford Motor Company Ltd.
Laindon, United Kingdom

Frank Wallace and Chris Brace
School of Mechanical Engineering
University of Bath
Bath, United Kingdom

11. Control Technologies In Compression-Ignition Engines

Dr. Stephen Charlton
Director, Advanced Diesel Engine Technology
Cummins Engine Company, Inc.
Mail Code 50174
1900 McKinley Avenue
Columbus, Indiana 47201
tel: 812-377-8788
fax: 812-377-7226
e-mail: 103173.622@compuserve.com

PART V

TWO-STROKE ENGINES

12. Introductory Chapter: From a Simple Engine to an Electrically Controlled Gasdynamic System

Prof. Dr. Cornel Stan
College of Technology and Economics
Westsaxon Institute of Zwickau
Germany
tel: 49-375-536-1600
fax: 49-375-536-1193
e-mail: cornel.stan@fh-zwickau.de

13. Air Pollution from Small Two-Stroke Engines and Technologies to Control It

Prof. Yuji Ikeda and Tsuyoshi Nakjma
Department of Mechanical Engineering
Kobe University
Rokkodai, Nada
Kobe, Japan
tel: 81-78-803-1 114
fax: 81-78-845-2736
e-mail: ikeda@mech.kobe-u.ac.jp

Prof. Eran Sher
Dept. of Mechanical Engineering
Ben-Gurion University

Beer-Sheva 84 105
Israel

14. Air Pollution from Large Two-Stroke Engines and Technologies to Control It

Dr. Svend Henningsen
MAN and B&W Diesel A/S
Copenhagen SV
DK-2450
Denmark
tel: 45-3385-1100
fax: 45-3385-1030
e-mail: svend.henningsen@copenhagen@manbw.dk

PART VI _____

15. Introductory Chapter: Fuel Effects

Dr. David Blackmore
Research Centre
Shell Research, Ltd.
Thornton P.O. 1
Chester CH1 3SH
United Kingdom
tel: 44-151-373-5768
fax: 44-151-373-5674

16. Fuel Effects on Emissions

Prof. Yoram Zvirin
Department of Mechanical Engineering
Technion, Haifa 32000, Israel
tel: 972-4-292-070
fax: 972-4-324-533
e-mail: meryzvi@tx.technion.ac.is
